

# Supply Chain Network Review

Helping companies review their Supply Chain  
Networks for over **30 years**

Businesses are constantly changing and evolving. Supply Chains need to be aligned to meet your business goals whilst always looking after customer demands.

Today's Supply Chains are more complex than ever, involving increasingly lean organisations and high-tech IT systems.

It is therefore important to have regular reviews of the way your network operates in real life and what needs to change as your business changes.

## Examples of business changes requiring a review...

### New Players

New senior appointment, New ownership, Internal re-organisation

### Strategic Thinking

Business strategy review,  
Carbon reduction objectives,  
Future-Proofing

### Reaction To Business Change

New channel to market, Customer changes, Brexit impacts

### Reaction To Ongoing Frustrations

Substandard service level,  
Capacity issues,  
Lack of visibility,  
Labour availability/quality

### Reaction To Financial Concerns

Looking for cost savings,  
Unexplained logistics costs,  
year on year increases,  
Lost customers

# What We Do

## METHOD

Rigorous and methodical approach to reviewing company's logistics networks (warehouses, transport and inventories)

Scope configurable to meet desired outputs

3 Phased approach -  
1. Discovery (audit existing)  
2. Future Scenario Modelling  
3. Future Solution Outputs

## BUSINESS OUTPUTS

Creating a strategic vision for change

Benchmarking the current against best practice

Highlighting supply chain business risks

Making sure the supply chain supports the overall business objectives

## SUPPLY CHAIN OUTPUTS

Generate cost savings and service improvements

Configure and optimise opex/capex/service/risk trade-offs

Factor in the implementation of new technology and automation to manage the risks more effectively

Create cost and performance visibility - giving you control levers

## Why Bisham?

**An independent view of the future taken 100% from a 'what's best for the client' perspective. No risk of suppliers selling you what they can deliver rather than what you might need.**

**Configurable to requirements, budget and client's circumstances.**

**As ex-operators a commercial and practical 'real-world' perspective is taken of what is achievable both operationally and financially.**

**We ensure we bring the business with us, so future solutions can be owned and anchored in the business to facilitate the delivery of future change.**
